## PRESS RELEASE

**FOR IMMEDIATE RELEASE**

### FOXMARK TO UPGRADE ITS MANUFACTURING CAPABILITIES

**HOUSTON, TX (May 20, 2020)** — Foxmark Corporation is excited to announce the conclusion of a deal with EFI to upgrade its VUTEK® 5r printer to the top-of-the-line **VUTEK® 5r+**. The delivery and installation of the new press is expected to occur in mid- to late-June.

The **5r+** represents the best of technology in the graphics manufacturing industry. A five-meter LED roll-to-roll digital press, it boasts 18 print heads with 7 picoliter UltraDrop Technology producing resolution up to 1200 dpi. Additionally, the **5r+** doubles production speeds for applications utilizing white ink.

“Our upgrade to the 5r+ will impact our production capabilities immensely,” said Richard Fox, Foxmark CEO. “On top of reducing energy usage and driving down the overall cost of day-to-day operations, the new printer will greatly increase our ability to manufacture our products quickly. This is a great thing for Foxmark and for our clients.”
